

The OSE120CB is perfectly suited for intense picking together with occasional stacking activities. The OSE120CB is designed to simplify the entire order picking process by adding pallet handling as an extra feature. Efficiency together with safety are key words.

1) If less than 475kg, add counterweight up to minimum weight

2) Over head guard is mandatory for h₂₃ above 1800mm

3) Truck height is limited by h₆

- The new E-MAN steering concept is ideally suitable for picking as well as for pallet handling applications. Light, one hand operation increases the flexibility for the driver and at the same time simplifies driving in the fork direction.
- The new steering handle can easily be adjusted sideways. This optional feature is excellent when the driver wants to operate the truck while walking along it. Its flexible solution will also help the operator in difficult manoeuvring situations.
- The performance of the OSE120CB is first-rate. A travel speed of 12 km/h together with high acceleration increases the number of pick-ups. With our motor technology it is very easy to adjust top speed, acceleration and speed reduction to meet individual requirements.
- The BT POWERDRIVE system provides reliability and simplicity. CAN-bus technology means fewer parts and reliable transmission of data. A PIN code start up procedure offers higher operational safety by stopping unauthorised driving.
- The forks can be elevated to ensure an ergonomic working position. It is also possible to stack pallets up to maximum 4.1m lift height. Since the design is without any support arms the truck can easily operate closed pallets.
